DETAILED ACTION

Examiner of record of this application has changed. Please address all further correspondence to Examiner Michael Borin, AU 1631.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/08/05 has been entered.

Claims 12-22 are currently pending.

It is noted that claims 20 and 21 are duplicates.

Upon review of the amended claims, the following restriction requirement was deemed necessary.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 12-19,22, drawn to a composition of a nucleic acid mimic of formula I, classified in class 514, subclass 02.
- II. Claims 20,21, drawn to a nucleic acid mimic of formula IIIa, classified in class 530, subclass 350.

Art Unit: 1631

Inventions I and II are directed to related products. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the genres of the “mimics” as claimed do not overlap in scope. Foreexample, the scope of the Group II encompass compounds unrelated to nucleic acid mimics, i.e., wherein L is a random heterocyclic base (compared to nucleobases in claim 22); the scope of Group I encompasses permutations of L not encompassed by the genus of Group II, such as L = hydroxy, aromatic moieties, reporter ligands, etc. The groups will require non-coextensive literature and patent searches.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Election of Species Requirement

Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a))

Upon election of any single one of the Groups from above the following election of species is hereby required for the initial search for examination on merits:

The claims of Group are individually or dependently directed to a plurality of disclose patentably distinct species of "nucleic acid mimics". Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (i.e., a single compound), even though the requirement is traversed. Applicant should include a chemical structure of the elected compound if not already contained in the specification.

In addition, if Group II is elected, applicant is requested to elect species of the second component of the composition the "mimic" is admixed with.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (571) 272-0713. The examiner can normally be reached on 9am-5pm.
